EDUCATION

University of Illinois at Urbana-Champaign

Master of Computer Science | GPA: 3.83/4.0

Specialization: Distributed Systems, Databases, Computer Networks

B.S. in Computer Science and Economics | GPA: 4.0/4.0 | Summa Cum Laude

Champaign, IL

Aug 2025 - May 2026

Aug 2022 - May 2025

EXPERIENCE

Stripe

Software Engineer

- Incoming Full Time Software Engineer at Stripe

San Francisco, CA

Starting Aug 2026

Capital One

Software Engineering Intern

- Engineered a highly scalable, serverless AWS event-driven pipeline using **Lambda**, **SQS**, and **Kafka**, enabling near-instantaneous filtering of **1M+ monthly real-time events** and automating customer email notifications, decreasing manual workflows by **95%**.
- Designed a schema for real-time data ingestion into **Snowflake** and **Kafka**, enabling efficient downstream data processing and analytics.
- Led migration of an existing application to **Java Spring Boot**, integrating 4 internal APIs and ensuring fault tolerance and scalability for **40K+** monthly account-opening applications.

New York City, NY

Jun 2025 - Aug 2025

Honeywell

Software Engineering Intern III

- Engineered a secure data pipeline, enabling a **300+** member business unit to develop new applications by creating a **Python** API for efficient data access from Apache **HDFS**.
- Dockerized** team-developed **.NET** API projects, packaging each service into containers to ensure environment consistency and accelerate deployment cycles.

Kansas City, MO

Jun 2024 - Aug 2024

Software Engineering Intern II

- Designed an internal software product with a deployment scale of **10K+** users by designing backend infrastructure and implementing REST APIs for data transmission.
- Deployed a **MongoDB**-backed REST API that reduced engineers' manual data-retrieval workflows by upwards of **90%**.

Jun 2023 - Jun 2024

LEADERSHIP AND INVOLVEMENT

Disruption Lab at Gies

Technical Director

- Led 80+ engineers** across 10 technical projects, delivering AI, Blockchain, and AR/VR solutions for startups, Fortune 500s, and public sector clients by leading technical strategy, managing execution, and pitching deliverables to stakeholders.
- Progressed from leading individual AI projects to owning cloud infrastructure and serving as the primary technical point of contact for an 80+ person organization.

Champaign, IL

Aug 2023 - May 2025

PROJECTS

NFL Play Prediction Model | Python, NumPy, Pandas, Scikit

Feb 2025 - May 2025

- Developed several machine learning models (Random Forest, Decision Trees, Logistic Regression, Ensemble) to predict NFL play types from pre-snap data, achieving **73.4%** test accuracy.
- Trained on **370K** data points, using χ^2 and correlation analysis to isolate 12 high-impact pre-snap features.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, C#, JavaScript, HTML/CSS, SQL, Go

Frameworks/Technologies: Spring, MongoDB/NoSQL, GraphQL, Flask, NLTK, Kafka, Snowflake

Developer Tools: AWS, Git, Docker, Jira, Confluence
